7. Route Checks

The route checks used on this event will be car number plates split in half, most will be at SGW junctions, some will just be found on the correct route, but the navigation will tell you when to expect one.

As is traditional on Hexham events, we will also use signposts as route checks where possible. These will all be at SGW junctions and will be facing you (assuming you arrive from the correct direction?). At the road sign you will be asked to record the correct place name from the distance given, or the correct distance for the Place name given. The time card will tell you what you are looking for.

8. Navigation

The following types of navigation will be used on the event, if you are not familiar with any of them or have any questions, please contact Ali Procter before the event.
